

Professional Coaching Services designed for writing instruction excellence.

Research shows that teacher practice is a critical factor in the success of classroom writing instruction—and a key component of literacy achievement overall. By providing a complete platform of teaching support, our science-based Coaching Services help ensure the fidelity of writing instruction and promote best practices in the classroom. Included are:

Curriculum Alignment. A roadmap for language consistency and best practices will be developed according to specific district’s literacy goals and requirements and applied to existing curriculum documents.

Modeled Lessons. An Empowering Writers (EW) coach plans and delivers a live modeled lesson in the classroom for the purposes of observation, followed by a debriefing, Q&A and “next steps” action plan for participating teachers.

Observation & Feedback. Participating teachers will be observed by an EW coach in a live classroom setting and provided with annotated feedback and recommendations.

Student Samples. Student-generated samples are analyzed through the application of EW rubrics, followed by verbal and written feedback and “next step” recommendations for future classroom instruction.

Test Prep. Teachers are guided in their preparation for state assessments. Analyzing student exemplars through the lens of EW strategies offers a new ability to achieve top scores and pinpoint powerful lessons that support student learning.

Implementation Support. Ongoing conversations and classroom visits with EW coaches and administrators help ensure instructional consistency, support accountability and highlight student achievement.

On-line Chat. Online access to EW support for guidance, product, or instructional needs.

A powerful partnership that helps you meet student literacy goals.

The Empowering Writers approach to writing instruction emphasizes the essential connection between effective writing skills and literacy achievement as a whole.

Our full-day interactive workshops maximize teacher engagement and deliver valuable, pragmatic takeaways unique to the EW system. Our knowledgeable presenters are experienced K-8 classroom teachers who know how to make the most of your time – experts who will leave you with a new ability to apply what you’ve learned in your own classroom setting.

Join us for a full day of actionable learning.

EW workshops offer more than practical information; you’ll have time to process and apply new learning, discuss novel teaching concepts with colleagues and experience a variety of multi-sensory activities designed to engage and inform. You’ll take away classroom lessons you can implement right away, and forge an ongoing connection to resources that help you master expert K-8 writing instruction.

“Because of Empowering Writers, our teachers have learned skills and strategies to successfully implement lessons for writing instruction. We are thrilled to see progress in students’ understanding and an increase in test scores.”

Rebecca C.
Elementary ELA Coordinator - Richland One County, SC

Implementation Edge

Our proven methodology and lesson design provide teachers with an instructional edge. Specifically, teachers will understand the impact of a common language, assured experiences, skill development, and strong vertical alignment. The EW approach to instruction transcends writing and puts the “best” back into teaching practices

Literacy Launch and Foundational Skills Workshop

This initial training establishes the writing-reading connection and supports teachers on both generative and responsive writing for grades 2-8 teachers.

Professional Development that includes:

- Literacy Launch and Foundational Skills Workshop - 6 hours (In-person or LIVE Zoom)
- (2) Virtual Follow-up sessions - available as needed

Constructed Response - A Step-by-Step Approach Workshop

This training is the next step for teachers ready to take a deeper dive into the process of analyzing and responding to a source text.

Professional Development that includes:

- Constructed Response Workshop - 6 hours (In-person or LIVE Zoom) includes:
 - Instructional tools to analyze and annotate text
 - How to paraphrase and cite evidence in source texts (narrative and informational)
 - How to model the step by step process to a well written response
- (2) Virtual Follow-up sessions - available as needed

Workshop Pricing

One Workshop - \$4,000*

Both Workshops - \$7,900*
